## Linear Actuator Requirement Sheet

Fill in this sheet with as much detail about your requirement as possible.
Once complete, please attach it in an email and send to sales@kelstonactuation.com. A design engineer will then be in touch to discuss your project.

## Contact Details

| Your company name: |  |
| :--- | :--- |
| Your name/position |  |
| Company address |  |
|  |  |
| Telephone |  |
| Email address |  |

## Performance Requirements

| Mounting position of Actuator | Vertical <br> Horizontal <br> Moving through arc | $\square$ |
| :--- | :--- | :--- |
| Actuator mounting orientation | Upright <br> Inverted | $\square$ |
| Mounting Type Fixing - Ram Tube End | Clevis <br> Gimble/U-J <br> Flange <br> Trunnion <br> Other | $\square$ |

| Mounting Type Fixing - Main Driver Body End | Clevis <br> Gimble/U-J <br> Flange <br> Trunnion <br> Other |
| :---: | :---: |

| Sense of applied load | Compression <br> Tension <br> Tension/Compression | $\square \square$ |
| :--- | :--- | :--- |

## Load Characteristics

| Number of Actuators in the system |  | $y$ |  |
| :---: | :---: | :---: | :---: |
| Total Dynamic load |  |  | kN |
| Total Static load |  |  | kN |
| Max dynamic load/unit | Compression |  | kN |
|  | Tension |  | kN |
| Max static load/unit | Compression |  | kN |
|  | Tension |  | kN |
| Mean load <br> Does Load Change Thoughout Stroke <br> Ram Travel |  |  | kN |
|  |  | Yes/No |  |
|  |  |  | mm |
| Linear speed for outward travel - Max Dwell time |  |  | $\mathrm{mm} / \mathrm{min}$ |
|  |  |  | min |
| Linear speed for inward travel - Max Dwell time |  |  | $\mathrm{mm} / \mathrm{min}$ |
|  |  |  | min |

| Is outward travel continuous? <br> If NO how many stops $\qquad$ \# Dwell time Is inward travel continuous? <br> If NO how many stops $\qquad$ \# Dwell time <br> Dynamic movement ?(please explain) |  | Yes/No | min |
| :---: | :---: | :---: | :---: |
|  |  | Qty |  |
|  |  | Yes/No |  |
|  |  | Qty | min |
|  |  |  |  |
| Number of cycles per hour |  |  | Qty |
| Number of cycles per day |  |  | Qty |
| Number of working days per year |  |  | Qty |
| Number of years of expected life |  |  | Qty |
| Backlash Tolerance? |  |  | mm |
| Is there any vibration in the structure? |  | Yes/No |  |
| Is human cargo being carried? |  | Yes/No |  |
| Can the structure impose side loads by |  | Yes/No |  |
|  | Expanding | $\square$ |  |
|  | Contracting | $\square$ |  |
|  | Deflecting | $\square$ |  |

| Is the system guided? (recommended) | $\mathrm{Yes} / \mathrm{No}$ |  |
| :--- | :--- | :--- |
| Is a special closed height required? | $\mathrm{Yes} / \mathrm{No}$ |  |

## Environmental Conditions

| Clean Room | $\square$ |
| :--- | :--- |
| Outside | $\square$ |
| Dusty | $\square$ |
| Icy | $\square$ |
| Direct sunlight | $\square$ |
| High humidity - If yes what \% | $\square$ |
| Marine | $\square$ |
| Wet | $\square$ |
| Corrosive | $\square$ |
| Radioactive | $\square$ |

| Operating temperature - MIN |  | ${ }^{\circ} \mathrm{C}$ |
| :--- | :---: | :---: |
| $\quad$ MAX | ${ }^{\circ} \mathrm{C}$ |  |
| Altitude above sea level |  | metres |
| Noise level limit |  | $\mathrm{dBA} @ 1$ metre |
| Ingress protection code |  | IP |

## Prime Mover

| Kelston Supply | $\square$ |
| :--- | :--- |
| Electric motor | $\square$ |
| Servo | $\square$ |
| Hydraulic motor | $\square$ |
| Pneumatic motor | $\square$ |
| Hand Wheel | $\square$ |
| Is brake required? | $\square$ |

## Controls

| Position control devices required | Encoder |
| :--- | :--- |
|  | $\square$ |
|  | $\square$ |
|  | Limit Switches |

If YES give a brief description below

Undefined or Special
Requirements

## Proposed Layout of System

Calculations
